Our annual meeting is recognised for uniting a diverse community of stakeholders across medicine, medtech, and technology - all committed to driving innovation and enhancing outcomes in cardiovascular care.

Our annual meeting brings together experts in stroke, lipid, cardiac, metabolic, and related specialisms, with representation from primary and secondary care professionals from primarily across Scotland, alongside attendees from the wider UK and internationally. Our conference provides a platform for meaningful discussions and knowledge exchange.

At SHARP, we are dedicated to shaping patient care through healthcare research and educational initiatives. As a charity, our mission is to reduce cardiovascular disease by driving forward initiatives that have a direct impact on patient outcomes. Your participation as a sponsor not only supports the advancement of healthcare in this area but also grants you access to a prominent platform where you can connect with healthcare professionals dedicated to cardiovascular health.

Programme

The 2026 Annual Meeting of SHARP & SLF will focus on the current dilemmas in cardiovascular & metabolic conditions relevant to both primary & secondary care.

The event's schedule will feature submitted abstracts, invited lectures, discussions, and case presentations. Attendees will also have the opportunity to participate in hands-on workshops exploring specific scenarios, complemented by original contributions from professionals across the UK, fostering extensive interaction and discussion.

Our focus encompasses a diverse range of conditions, including lipid disorders, cardio-oncology, stroke, obesity, heart failure, and renal, among others. Stay tuned as our programme continues to evolve!

Shaping Patient Care

Our Annual Meeting will not only advance professional knowledge but also play a pivotal role in shaping patient care. By fostering collaboration between primary and secondary care professionals, the event will facilitate the exchange of innovative ideas and best practices.

Through discussions on use of data, new therapies, and expanded applications of existing treatments, attendees will gain valuable insights into optimising Scottish patient care pathways, with a particular focus on remote and rural. Moreover, the hands-on workshops and case presentations will provide practical tools and strategies for addressing complex clinical scenarios, ultimately leading to improved patient outcomes.

As professionals come together to share their expertise and experiences, the collective knowledge gained at the meeting will have a direct impact on enhancing the quality of care delivered to patients. Furthermore, the session chairs and organising committee encourage attendees to engage with industry colleagues throughout the event.
